Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to a method directed to a shopping cart wherein by changing the attributes of a primary item changing a corresponding attribute of a secondary item, classified in class 705, subclass 26.
 - II. Claims 5-6, drawn to a method directed to a shopping cart wherein by changing the quantity of a primary item changing a corresponding quantity of a secondary item, classified in class 705, subclass 26.
 - III. Claims 7-8, drawn to a method directed to a shopping cart wherein by changing the color of a primary item changing a corresponding color of a secondary item, classified in class 705, subclass 26.
 - IV. Claims 9-10, drawn to a method directed to a shopping cart wherein by changing the size of a primary item changing a corresponding size of a secondary item, classified in class 705, subclass 26.
 - V. Claims 11-12, drawn to a method directed to a shopping cart wherein by removing a primary item identifying a corresponding secondary item linked to the primary item and removing the same, classified in class 705, subclass 26.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require

Art Unit: 3625

the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the attribute to be changed of the primary item need not be a change in quantity, it could be any other attribute such as color, size, design, customization feature, etc. The subcombination has separate utility such as directed to only a change in the quantity of the primary and secondary items. Inventions I and III, I and IV and I and V are also related as combination and subcombination based on same rationale.

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility, when compared with the Invention II, such as change in the color of a primary item results in a change of a color of the secondary item. Inventions II, III, IV and V are also related as combination and subcombination based on same rationale. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and the search required for Group one is not required for other Groups, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 3625

5. A telephone call was made to Mr. Gerry Woods on 4/10/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
